Enhanced Safe Browsing for your account

Faster, proactive protection against dangerous websites, downloads and extensions. Requires browsing data to be sent to Google.

- **Keeps you safe and is used to improve your security in Google apps, such as Chrome, Gmail, or Chat, when you are signed in**

- **Improves security for you and everyone on the web**

- **In Chrome, warns you if passwords are exposed in a data breach**

- **Sends URLs from Chrome and Google apps to Safe Browsing to check them. Also sends a small sample of pages, downloads, extension activity, and system information to help discover new threats. Temporarily links this data to your Google Account when you're signed in, to protect you across Google apps.**
